

The Columbia River Quorum: Bringing the Climate Home

PARTICIPANTS

John C. Bliss is Starker Chair in Private and Family Forestry at Oregon State University, where he conducts research on social and cultural dimensions of small-scale forest management. John is Co-editor-in-Chief of the international journal, Small-scale Forestry, and is currently engaged in research on small-holder forestry in Ethiopia. John is passionate about music and active in the Corvallis, Oregon avant-garde music scene.

Alison Hawthorne Deming is a poet, essayist, and professor of English at University of Arizona. She is the author of Science and other Poems, selected for the Walt Whitman Award of the Academy of American Poets, Temporary Homelands: Essays on Nature, Spirit and Place and seven other books. Her forthcoming book is a collection of essays, Murder, Raft, and Exaltation: My Life with Animals.

Robert Frodeman is the former Chair of the Department of Philosophy and Religious Studies at the University of North Texas (UNT), where he specializes in environmental philosophy, the philosophy of science policy, and the theory of interdisciplinarity. Bob is the author of Geo-Logic: Breaking Ground between Philosophy and the Earth Sciences (2003), co-editor of the Encyclopedia of Environmental Ethics and Philosophy (2008), and editor of the forthcoming Oxford University Press Handbook of Interdisciplinarity (2009). Frodeman is now the founding director of the Center for the Study of Interdisciplinarity at UNT (www.csid.unt.edu)

Charles Goodrich* serves as the Program Director for the Spring Creek Project for Ideas, Nature, and the Written Word at Oregon State University. He is the author of Insects of South Corvallis (poems) and The Practice of Home (essays), and he served as lead editor of the book In the Blast Zone: Catastrophe and Renewal on Mount St. Helens. Garrison Keillor reads Charles' poems on the "Writers' Almanac" radio program.

Eban Goodstein is Professor of Economics at Lewis & Clark College, and Director of the National Teach-in on Global Warming Solutions, engaging over a thousand educational institutions nationwide. Recent books include Economics and the Environment and Fighting for Love in the Century of Extinction: How Passion and Politics Can Stop Global Warming. Goodstein received his B.A. from Williams College and his Ph.D. from the University of Michigan.

Hank Green is the chief editor and founder of EcoGeek.org, the web's largest environmental technology publication. EcoGeek's content is featured consistently at the Huffington Post, Scientific American and Yahoo.com. Hank also runs one of YouTube's most successful projects at youtube.com/vlogbrothers in which he and his brother try to get young people to care about their world.

Mark Hixon* is Helen Thompson Professor of Marine Conservation Biology at Oregon State University, and an expert on coastal marine ecology. Mark is a scientific advisor to marine conservation groups, including the Pacific Marine Conservation Council, the Communication Partnership for Science and the Sea, and the Bahamas National Trust. Dr. Hixon is recent chair of the National Science Foundation Ocean Science Advisory Subcommittee and the current chair of the National Marine Protected Areas Federal Advisory Committee.

Carly Johnson is a writer, interdisciplinary researcher, and environmental activist. She founded the Campus Carbon Challenge, a grassroots initiative encouraging people to reduce their carbon dioxide emissions by making change to their daily routines. She is also a former resident of Penn State University's Renewable Energy Homestead at the Center for Sustainability, where she lived within her ecological footprint by growing her own food, processing all wastes, and generating renewable energy.

Kathleen Dean Moore* is Distinguished Professor of Philosophy and University Writer Laureate at Oregon State University, where she directs the Spring Creek Project for Ideas, Nature, and the Written Word. An environmental philosopher and award-winning author of books about our cultural and spiritual relation to the natural world, she is co-editing a new book, For All Time, a collection of writings to establish a global moral consensus about our obligations to the future in a time of climate change.

The Columbia River Quorum: Bringing the Climate Home

Michael P. Nelson is professor of environmental ethics at Michigan State University, where he holds a joint appointment in the Lyman Briggs College and the Department of Fisheries and Wildlife. He is the co-editor of The Great New Wilderness Debate and The Wilderness Debate Rages On, and the co-author of American Indian Environmental Ethics: A Case Study.

Matthew Nisbet is a social scientist at the School of Communication, American University. He studies strategic communication in policymaking and public affairs, especially controversies surrounding science and the environment. Matthew is an affiliated researcher with the Center for Climate Change Communication at George Mason University. He serves on the editorial board for the International Journal of Press/Politics and posts regularly to the blog Framing Science.

Kathie L. Olsen is former Deputy Director of the National Science Foundation (NSF). In her present role as Senior Advisor at NSF, she will be responsible for program officer training and education in merit review, and interdisciplinary and transformative research. She has also served as Associate Director and Deputy Director for Science in the Office of Science and Technology Policy (OSTP), and as the Chief Scientist at the National Aeronautics and Space Administration. As NASA Chief Scientist, she served as the Administrator's senior scientific advisor and principal interface with the national and international scientific community.

Scott Russell Sanders is an award-winning writer and professor of English at the University of Indiana. Among his more than twenty books are novels, collections of stories, and works of personal nonfiction, including Staying Put, Hunting for Hope, and A Private History of Awe, which was nominated for the Pulitzer Prize. A Conservationist Manifesto, his vision of a shift to a sustainable society, will be published in 2009. His writing examines the human place in nature, the pursuit of social justice, and the relation between culture and geography.

Andreas Schmittner is assistant professor at the College of Oceanic and Atmospheric Sciences at Oregon State University. He uses computer models to improve our understanding of past and possible future climate changes and has contributed to the last assessment report of the Intergovernmental Panel on Climate Change. Recently Andreas has become more interested in communicating the science of climate change to the public.

Pam Sturmer is Managing Director of the Leopold Leadership Program at Stanford. For the past decade Pam has worked in communications and nonprofits to promote understanding between scientists, environmentalists, decision-makers, and business leaders. Before joining the Leopold Leadership Program, Pam was the executive officer of the San Francisco Watershed Council. Pam graduated from Yale College with a B.A. in English literature and environmental history.

Frederick J. Swanson* is a Research Geologist with the USDA Forest Service, Pacific Northwest Research Station whose work has concentrated on interactions of geological and ecological forces in mountain lands. He is coauthor or coeditor of Bioregional Assessments: Science at the crossroads of Management and Policy, Road Ecology: Science and Solutions and Ecological Responses to the 1980 Eruption of Mount St. Helens.

Steve Vanderheiden is professor of political science at the University of Colorado, specializing in normative political theory and environmental politics. He is the author of Atmospheric Justice: A Political Theory of Climate Change, and an edited volume Political Theory and Global Climate Change. Recent and forthcoming articles include "Radical Environmentalism in an Age of Antiterrorism" in Environmental Politics, and "Allocating Ecological Space" in Journal of Social Philosophy.
